

TEZSPIRE is a prescription medicine used with other medicines for the maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in people 12 years of age and older whose CRSwNP is not controlled with their current CRSwNP medicine.

Your Personal Doctor Discussion Guide

- ▶ While nasal polyps can impact you on a daily basis, TEZSPIRE can help you break away from a cycle of temporary relief.
- ▶ TEZSPIRE is not a nasal spray, steroid, or surgery. It's a treatment that proactively targets inflammation, which can cause nasal polyps.
- ▶ Talk to your doctor to see if TEZSPIRE could help treat your nasal polyps.

The mechanism of action for TEZSPIRE in the treatment of nasal polyps and asthma is not fully understood.

Identify some of your symptoms

	Never	Rarely	Often	Frequently
Stiffness and congestion	☐	☐	☐	☐
Loss of sense of smell	☐	☐	☐	☐
Facial pain or pressure	☐	☐	☐	☐
Loss of sleep	☐	☐	☐	☐
Runny nose	☐	☐	☐	☐
Other	Please note any additional symptoms on the next page.			

When telling your doctor about your symptoms, it could help to use descriptive language—and be sure to let them know how your nasal polyps impact you on a day-to-day basis.

Share your recent nasal polyp treatment history

- ☐ Steroid nasal spray
- ☐ Saline nasal spray (or saline nasal rinse)
- ☐ Steroids
- ☐ Surgery
- ☐ Other: _____

Discuss your treatment goals

- What I want from my nasal polyp treatment is...
- ☐ Help with relief from my symptoms
- ☐ Less potential need for surgery and/or steroids
- ☐ Other: _____

IMPORTANT SAFETY INFORMATION

Do not use TEZSPIRE if you are allergic to tezepelumab-ekko or any of its ingredients.

Do not use to treat sudden breathing problems.

TEZSPIRE may cause serious side effects, including:

- **allergic (hypersensitivity) reactions, including anaphylaxis.** Serious allergic reactions can happen after your TEZSPIRE injection. Allergic reactions can sometimes happen hours or days after you get a dose of TEZSPIRE. Call your healthcare provider or get emergency help right away if you get any of the following symptoms of an allergic reaction:
 - rash
 - breathing problems
 - hives
 - red, itchy, swollen, or inflamed eyes
 - swelling of your face, mouth, and tongue
 - fainting, dizziness, feeling lightheaded

Before using TEZSPIRE, tell your healthcare provider about all of your medical conditions, including if you:

- have ever had a severe allergic reaction.
- have a parasitic (helminth) infection.
- have recently received or are scheduled to receive any vaccinations. You should not receive a “live vaccine” if you are treated with TEZSPIRE.
- are pregnant or plan to become pregnant.
- are breastfeeding or plan to breastfeed. It is not known if TEZSPIRE passes into your breast milk. Talk to your healthcare provider about the best way to feed your baby if you use TEZSPIRE.
- are taking prescription and over-the-counter medicines, vitamins, or herbal supplements.

Please see additional Important Safety Information on the next page and accompanying full Prescribing Information, including Patient Information and Instructions for Use.

Is **TEZSPIRE** right for you? Ask these questions at your next doctor’s visit to help find out.

1. How can TEZSPIRE help relieve the symptoms of my nasal polyps?
2. How is TEZSPIRE different from other treatments?
3. What are the possible side effects of TEZSPIRE?
4. How is TEZSPIRE taken?
5. Who should not take TEZSPIRE?
6. What if I can’t afford TEZSPIRE?

Feel free to use the space below to take notes during your appointment.

TEZSPIRE can help you break away from a cycle of temporary relief

In a one-year clinical trial, TEZSPIRE was proven to help:

IMPROVE CONGESTION

SHRINK NASAL POLYPS

REDUCE THE NEED FOR SURGERY AND/OR STEROIDS

IMPROVE YOUR SENSE OF SMELL

Individual results may vary.

IMPORTANT SAFETY INFORMATION (CONT'D)

Do not change or stop taking your other asthma medicines unless instructed to do so by your healthcare provider.

The most common side effects of TEZSPIRE include: Sore throat, joint and back pain, common cold symptoms, flu, upper respiratory tract infections, injection site reactions, and nose bleeds. These are not all the possible side effects.

Approved Use

TEZSPIRE is a prescription medicine used:

- with other medicines for the maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in people 12 years of age and older whose CRSwNP is not controlled with their current CRSwNP medicine.

TEZSPIRE helps:

- reduce the size of your polyps, improve symptoms including i.e. nasal congestion and loss of smell, and reduce the need for oral corticosteroids and surgery for your nasal polyps in CRSwNP.

Please see accompanying full **Prescribing Information**, including **Patient Information** and **Instructions for Use**.
